DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of claims 12-15 in Paper No. 8 is acknowledged. The traversal is on the ground(s) that the claims are properly examinable together since two inventions are so closely tied that they are properly examined together. This is not found persuasive because the compositions are useful as coating.

2. The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 12-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 12 is dependent a claim that

has been withdrawn from consideration. Please rewrite claim 12 as an independent claim.

5. In claims 13-14, the Applicants use the term "preferably." Description of the examples or preferences is properly set forth in the specification rather than the claims. If stated in the claims examples and preferences lead to confusion over the intended scope of a claim. Therefore, each occurrence of "preferably" should be deleted.

6. Claim 15 provides for the use of dielectric film, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

7. Claim 15 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153

USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*,
255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

10. Claims 12-14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Marchese et al., EP 0 969 027 A1 (hereinafter "Marchese"). Marchese disclose PTFE based dispersions having

Art Unit: 1713

particle size of 50-125 nm. Marchese further disclose the use of PTFE as coating for electronics. See Marchese, page 3, lines 29-37 Marchese further discloses the use of anionic and non-ionic surfactants. See Marchese, page 4, lines 29-33. Although Marchese does not disclose all the characteristics and properties of the dielectric films disclosed in the present claims, based on the substantially identical properties of the base polymer and the use of base polymer, the Examiner has a reasonable basis to believe that the properties claimed in the present invention is inherent in the dielectric films disclosed by Marchese. Because the PTO has no means to conduct analytical experiments, the burden of proof is shifted to the Applicants to prove that the properties are not inherent. See In re Fitzgerald, 619 F.2d 67, 205 USPQ 594 (CCPA 1980); In re Best, 195 USPQ 430 (CCPA 1977); In re Napier, 55 F.3d 610, 613, 34 USPQ2d 1782, 1784 (Fed. Cir. 1995).

11. Even if the disclosure of Marchese does not satisfy the requirements of 35 USC 102(b), it still would have been obvious to one of ordinary skill in the art to arrive at the claimed dielectric films, because it appears that the claimed dielectric films are within the generic disclosure of Marchese and a person

Art Unit: 1713

of ordinary skill in the art would have expected all embodiment of Marchese to have similar properties. Applicant has not demonstrated that the differences, if any, between the claimed dielectric films and the PTFE compositions disclosed by Marchese give rise to unexpected results. The evidence presented to rebut the prima facie case of obviousness must be commensurate in scope with the claims to which it pertains. See In re Dill and Scales, 202 USPQ 805 (CCPA 1979).
